

Preface

It's my great pleasure to give a greeting speech in remembrance of the first Issue of the ICT Focus international journal. We have been planning to have an international online journal for the last few years and now we are very happy to publish our first issue. I'd like to give a great thanks to the editor-in-chief, editorial board, and staff members who supported this journal.

ICT Focus is open access and peer-reviewed new journal which covers the publication of all aspects of a broad area of research on "Communications and Networks", "Electronics and Hardware", "Information Technology and Information Systems", "Computer science", "Cyber Security and Privacy", "Industry 4.0 and interdisciplinary engineering" and "ICT based education and management" published by the School of Information and Communication Technology, Mongolian University of Science and Technology.

The first issue of the Journal hosts five research papers in the field of AI-based action recognition, machine learning algorithms and robot control, computational systems medicine, biological networks and graph mining, and core/access network planning and analysis. While thanking the authors of the papers published in our first issue, we invite the professors and researchers working in the field of all areas of the journal to consider our journal for publication of their papers.

We hope our journal provides you with an excellent opportunity to interact with fellow researchers and your research work will contribute to developing your research field in the future. We are confident that it will be the most fruitful and rewarding one.

Good luck to you all with your study and research.

Thank you,

Dr. Chuluunbandi Naimannaran

Director,

School of Information and Communication Technology,

Mongolian University of Science and Technology

Today it is my privilege to announce the establishment of the Information Communication and Technology Focus (ICT Focus) journal devoted to the Information and Communication Technology (ICT) field by the School of Information and Communication Technology (SICT), Mongolian University of Science and Technology (MUST). ICT Focus is a peer-reviewed, online, open-access (OA), and multidisciplinary where its scope stretches all aspects of research on information and communication technology for science, engineering, education, and society.

As an official journal launched by MUST, we aim to not only address the people working in this field within Mongolia but also reach out to global scientific communities. We sincerely welcome researchers all around the world to submit their original high-quality work which has not been published anywhere else. Being an online open access journal, we will serve easier and more timely communication for the authors and readers. We expect that the launching of ICT Focus would provide a great opportunity for Mongolian researchers, especially the young, and worldwide researchers to collaborate on theoretical and application-oriented research studies which would have global impacts.

ICT Focus is the first English peer-reviewed academic journal focused on ICT, the journal targets to be one of the reputed and trusted academic resources in the ICT field from the East Asia area and beyond. Thus, we seek to publish peer-reviewed original, high-quality research articles and survey articles, and short communications and case reports as well as in the future.

The establishment of a new journal and publication of the first issue certainly consumed significant effort and dedication; the first issue of ICT Focus had financial support from SICT, MUST. My truthful gratitude is given to all members of the journal working group, and all members of the editorial board. We are obligated to thank all the staff members on the editorial team and all the other individuals who contributed to the process. Readers, be pleased to read our first articles and see you with our second issue soon.

Dr. Munkhjargal Gochoo

Editor-in-Chief

Assistant Professor,

Department of Computer Science and Software Engineering, College of Information Technology,
United Arab Emirates University, Al Ain, United Arab Emirates
